ELKANA WATER & DIGITAL SOLUTIONS

Premium Pricing & Service Proposal

1.0 INTRODUCTION

Elkana Water & Digital Solutions specializes in efficient irrigation systems and modern digital solutions tailored for agricultural and water-based businesses. This proposal outlines a strategic approach to improve water efficiency, system performance, and digital presence.

We combine engineering precision with digital innovation to ensure our clients receive not only physical infrastructure but also the digital tools necessary to scale their operations in the modern market.

2.0 CLIENT CHALLENGES

Based on preliminary discussions, we have identified the following key areas requiring immediate attention:

- Inefficient water usage leading to high operational costs
- Lack of optimized irrigation design resulting in uneven crop growth
- Limited digital visibility hindering customer acquisition and brand trust

---

3.0 PROPOSED SOLUTIONs.

3.1 Water and Sanitation Solutions

- Comprehensive water quality analysis.
- Efficient water treatment system designs
- Solar systems design
- Water pump sizing and selection.
- Sprinkler system design
- Water-storage system design
- Waste water analysis and treatment.
- Water-saving recommendations and leak detection

3.2 Digital Solutions

- Professional website development (HTML, CSS, JS)
- On-page SEO optimization to rank higher on Google
- Performance improvements and mobile responsiveness

3.1 Irrigation and Agricultural Solutions

- Comprehensive site assessment and soil analysis.
- Efficient Irrigation system design customised to crop type and topography.
- Water-saving recommendations and leak detection
- Comprehensive site assessment and soil analysis.
- Efficient system design tailored to crop type and topography
- Water-saving recommendations and leak detection
